

Environmental Standards

Identifying and managing key environmental risks ensures we safeguard our people and our Ports.

Spills

Drainage

Flora & Fauna

Biosecurity

Dust

Noise

Waste

Spills

Objective: No spills result in harm to the environment

Controls
<ul style="list-style-type: none">• Spill kits available for each work front with appropriate spill kit materials• Work crews are familiar with emergency spill response• All chemicals are banded and stored appropriately

Safety & Health Above All Else

Fauna and Flora

Objective: Fauna and flora are not deliberately harmed

Controls

- Licensed animal handlers are used to relocate native animals
- Native plants and animals are not impacted without approval
- Awareness of local animal and plant habitat

Safety & Health Above All Else

Waterways/Drainage

Objective: All waterways and drainage are clean

Controls

- Chemicals and waste are not discharged to waterways or drainage
- Ensure product/chemicals are stored appropriately away from watercourses
- Report all waterway pollution events

Safety & Health Above All Else

Noise

Objective: Stakeholders and community and are not impacted by excessive noise

Controls
<ul style="list-style-type: none">• Position noise generating equipment and plant away from nearby sensitive stakeholders• Use noise reducing equipment/machinery• Reduce idling of machines and vehicles where appropriate

Safety & Health Above All Else

Dust/Air Quality

Objective: Stakeholders and community are not impacted by dust or poor air quality

Controls
<ul style="list-style-type: none">• All product/materials are appropriately covered• Reduce high risk dust activities during high wind periods• Use equipment that reduces dust and emissions

Safety & Health Above All Else

Biosecurity

Objective: All biosecurity issues are reported

Controls
<ul style="list-style-type: none">• Report all suspected biosecurity issues• Monitor product/equipment/vessels for foreign soil/animals/seeds• Biosecurity waste to be disposed appropriately

Safety & Health Above All Else

Waste

Objective: All sites are clean, and waste is disposed of appropriately

Controls

- Waste to be placed in correct wastes streams
- Litter is removed from work site
- Bins are not overflowing

Safety & Health Above All Else
